PROFILE

Backend-leaning fullstack developer skilled in NestJS, FastAPI, and Next.js, with hands-on experience delivering production systems for public-sector and startup clients. Currently pursuing a Master's in Computer Science (M1 Informatique, MISA track) while leading a 35-person team on a university-wide digitalization initiative. Comfortable owning a project end to end, from system design and API architecture through deployment with Docker and PostgreSQL.

EDUCATION

Master's in Computer Science – MISA Track

Université d'Antananarivo

2026 – 2027 (expected)

Antananarivo, Madagascar

Licence (Bachelor's) in Computer Science and Technology

Sciences and Technology Domain, Université d'Antananarivo

2023 – 2025

Antananarivo, Madagascar

EXPERIENCE

Project Lead (Chef de Projet) – Siansa Platform

Faculté des Sciences, Université d'Antananarivo

Jul 2026 – Present

Antananarivo, Madagascar

- Leading a cross-functional team of approximately 35 students, organized into functional poles and guilds, on the digitalization of the Faculté des Sciences
- Produced organizational charts and core project documentation, including the LMD reform structure and student/admin feature inventories
- Authored a consolidated status report (état des lieux) covering system architecture, repository inventory, and security posture, with a prioritized action plan

Fullstack Developer

CMIL / Prodigy

Apr 2026 – Jun 2026

Antananarivo, Madagascar

- Built and maintained fullstack features with Strapi v5 and React, applying a feature-based architecture and an atomic design system
- Themed the Strapi v5 admin panel and implemented email notification lifecycle hooks
- Integrated Cloudflare Turnstile for bot protection

Backend Developer

Commune Urbaine d'Antananarivo (CUA)

2025

Antananarivo, Madagascar

- Developed backend services with NestJS, using Redis for caching
- Debugged and resolved CORS issues for a NestJS backend deployed behind Cloudflare tunnels

PROJECTS

Grind v2 – Personal “Student OS”

- Turborepo monorepo combining React Native/Expo, React/Vite, and FastAPI
- Backed by PostgreSQL (SQLAlchemy/Alembic) and RustFS, with a GPT-4o RAG pipeline
- Deployed on DigitalOcean via Dokploy

Personal Portfolio – mandrindraa.is-a.dev

- Built with Next.js 16, TypeScript, Tailwind v4, and next-intl for EN/FR localization
- Features a dual design system and a WebGL shader background

llm2sh – Open-Source CLI Tool

- Python TUI that converts natural language into shell commands via the OpenAI or Ollama APIs

masterclass-next – School Management App

- Built with Next.js, Prisma, and NextAuth
- Implemented a surveillant dashboard with a teacher validation workflow, theme/language switching, and account management

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript, Python, NestJS, FastAPI, Next.js, React, React Native

Data & Infrastructure: PostgreSQL, Redis, SQLAlchemy, Docker, DigitalOcean, Dokploy

Other Tools: Strapi, Prisma, Git/GitHub, REST APIs, Cloudflare

ACHIEVEMENTS

- Huawei ICT Competition (Cloud Track) – Top 10 nationally, 2026
- CIRT-MDG / PRODIGY 2026 CTF – solved challenges in binary exploitation, steganography, forensics, and cryptography

LANGUAGES

Malagasy – Native | French – Fluent | English – Intermediate
